LEGAL PROVISIONS FOR FOREIGN ARCHITECTS

In Sweden the title "architect" is not protected, nor is the profession. Anyone can apply for a building permit. There are no legal restrictions to foreign architects exercising their profession in Sweden or having their projects implemented. It is however common that foreign architects in this situation for practical reasons collaborate with a Swedish architect.

In European, the competition rules stipulate that each team must include an architect. As architect counts all persons with a five-year architectural degree (master's degree). For the Swedish sites, we will approve everyone with a European degree that is accepted for a professional title by Architects Sweden (in Swedish "Sveriges Arkitekter", the national architects' organization). If your degree is not from a European country, you have additionally to be a member of a national European architects' organization affiliated with ACE or UIA.
